CASE STUDY:
Holy Trinity CE Primary School

LEVERSTOCK

Why settle for good when you can be outstanding ?

Take a creative approach to technology and enhance your student learning experience, build confidence in your teachers, and take your school to the highest level.

Holy Trinity CE Primary School rises to the challenge

"Leverstock transformed our infrastructure and ensures we continue to get full value from our new IT."

When the Department for Education released its most recent league tables, 100% of pupils at the school achieved Level 4, and nearly two-thirds (63%) achieved Level 5 in their Key Stage 2 (11-year-old) SATS results. The awesome results ranked the school in first place for Haringey, 7th best in London and 34th in the whole country.

What makes the achievement even more incredible is that just three years ago, the school was home to students whose future prospects were bleak because the teachers lacked the tools to deliver the ultimate learning experience. With a new head teacher leading a culture of aspirations, which focuses on learning, Ofsted says the school is 'good with outstanding leadership'.

"Now our creative computing curriculum is embedded across the school. The students use a variety of programmes and apps to publish, research and consolidate their learning. In addition, they are indulging in computational thinking, such as how a computer and the Internet work, how we communicate and how to code using 'Scratch', 'Espresso Coding' and various iPad apps."

Simon Knowles, Executive Headteacher, LDBS Academy Trust

Creativity breeds success

According to the Ofsted survey, "Learning: creative approaches that raise standards", schools that demonstrate good teaching blend the National Curriculum with creative approaches to learning, such as the well-integrated use of technology, to help students to obtain more from their learning journeys.

While research from Cambridge International Examinations, says using technology in the classroom helps students develop real-world skills, provides greater access to content and facilitates collaboration. Furthermore, for students with special educational needs, technology is often the most reliable and quickly rewarding route to achievement and confident personal development.

Give students the creativity to understand and change the world

To enable your students to be the best they can possibly be, you need technology that gives you:

- **Flexibility:** to adapt to different learning styles, subjects and teaching methods.
- **Mobility:** for student learning on the go, in the environment that suits them best.
- **Collaboration:** between students, teachers and external organisations.
- **Expansion:** so there's no limit to what your school can achieve.

Gone are the days when IT's only responsibility was basic support to fix PC issues. Now, like teaching, technology belongs in the classroom, empowering the next generation as they take their first steps on their educational journey.

63% of schools have a written technology strategy. Do you?
Cambridge International Examinations, 'Technology in the Classroom Survey'

Leverstock: passionate about education

With 20 years' experience, we understand how technology has the power to improve teaching quality and enhance the student learning experience. Think of us as an extension of your team; by implementing solutions that are tailored to your needs, we will maximise your investment in technology to build a collaborative learning environment, which ultimately adds value to your school.

Partner with us because:

- We understand the challenges facing schools and know how to overcome them.
- Our product knowledge, technical expertise and commercial focus is unrivalled.

We work with your leadership and management teams to help you to realise your ambition.

Do you want to be the best?

If you want to show Ofsted that your school is outstanding by enhancing your student learning experience, it's time to contact us.
